Is there a piece of "historical  
information" — what would it be? —  
from me — that would have  
a high chance of being covered  
as news?

Everyone trusted like a "celebrity" by  
the press (esp., mag.) will come through  
as a "celebrity" — egoist (usually true, in entire sense,  
bright-wight  
ego trip

(see reaction of '52 Classroom to g. public rings; Conton; Kulas...)

(What writers look for, want, interpret, report,  
rephrase; — consequences, pressure; largest on.  
usually these, to see what (see  
presence of reporter himself! and others: like  
reporting the staging of an "intimate" movie  
scene — necessarily, "theatrical, public-  
hypocritical, illusion...")

— no intent in scenes, no reporting of  
substance or content

(nature of reporters, seen more than  
the perception of editors' and readers'  
intent.)
